

REMARKS

1. ABSTRACT

The entire paragraph of the abstract has been replaced and rewritten with a clear and concise language in a separate sheet.

2. TITLE OF THE INVENTION

The old title of the invention (Auto Adjustment Video Projector (AAVP) has been replaced by a new title (Automated adjustment system for video projectors) that is accurate and more descriptive.

3. SPECIFICATIONS

The Background, the Brief summary and the detailed description of the invention have been amended using strikethrough, underlining and added paragraphs. Also the brief description of the drawings has been reworked.

The specification amendments have been made to bring appropriate corrections in the grammar and spelling and also to make the disclosure adequately and accurately descriptive without any attempt to change the subject matter of the invention.

4. CLAIMS

4.1. AMENDMENTS:

Claims 1 –7 have been canceled and;

New claims 8 –16 have been added.

Ridha Radhuan

The old version of the claims is replete with grammatical and spelling errors and is deficient in antecedent basis for limitations. They also don't begin on a separate sheet.

I made new claims 8 -16 that particularly point out and distinctly claim the subject matter which I regard as my invention. The new claims commence on a separate sheet.

The patentable novelty presented by the cancelled claims 1-7 and reworked in the new claims 8-16 is: A system and method for automating video projector settings: focus, brightness, contrast and color saturation.

4.2. DISTINCTION FROM THE REFERENCES:

I knew from PAIR on the USPTO website that the revival petition related to this patent application has been dismissed, but I didn't yet receive the examiner comments/objections by regular mail.

So, I only made corrections on the specifications, the claims and the drawings. I don't know yet if any prior art made of record is considered pertinent to this disclosure.

Would you, please, check if the last office action has been sent to me? Thank you.

5. DRAWINGS

Figure 1 is replaced by a new version;

Figure 2 (New) is added to give a better description of the different parts and interactions of the system.

Ridha Radhouane
